

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1. (Previously Presented) A molded article comprising a polytrimethylene terephthalate reinforced resin composition comprising 100 parts by weight of resin components and 5 to 300 parts by weight of wollastonite treated with amino-silane (C),

wherein the resin components consist of 97.2 to 70 parts by weight of a polytrimethylene terephthalate resin (A1), 2.5 to 29.7 parts by weight of a polycarbonate resin (A2) and 0.3 to 10 parts by weight of an epoxy resin (B), and

wherein the molded article is a bath product, a washroom product, a toilet product, a kitchen product, or a sink product.

2. (Canceled)

3. (Previously Presented) The molded article according to Claim 1, wherein the composition comprises a part of the resin components grafted on the crystalline inorganic filler in an amount from 0.01 to 5 parts by weight per 100 parts by weight of the wollastonite treated with amino-silane.

4 – 8. (Canceled)

9. (Previously Presented) The molded article according to Claim 1, wherein the composition further comprises a glass fiber (D) in an amount less than the amount of the wollastonite treated with amino-silane (C).

10. (Previously Presented) The molded article according to Claim 9, wherein the composition comprises a part of the resin components grafted on the wollastonite treated with amino-silane and on the glass fiber in an amount from 0.01 to 5 parts by weight per 100 parts by weight of the total of the crystalline inorganic filler and the glass fiber.

11. (Previously Presented) The molded article according to Claim 1, wherein the polytrimethylene terephthalate resin has an intrinsic viscosity [η] of 0.60 or more.

12. (Previously Presented) The molded article according to Claim 1, wherein the epoxy resin (B) is a novolac epoxy resin.

13. (Previously Presented) The molded article according to Claim 1, wherein the epoxy resin (B) is a novolac epoxy resin having an epoxy equivalent from 150 to 250 (/eq.).

14. (Previously Presented) The molded article according to Claim 1, wherein the epoxy resin (B) is a bisphenol A epoxy resin.

15. (Previously Presented) The molded article according to Claim 1, wherein the epoxy resin (B) is a bisphenol A epoxy resin having an epoxy equivalent from 600 to 3,000 (/eq.).

16.-18. (Canceled)

19. (Previously Presented) The molded article according to Claim 1, wherein the molded article is a washroom counter, a kitchen counter, a bathtub, a wash bowl, a hand-wash bowl, a toilet counter, or a cabinet counter top.

20. (Previously Presented) The molded article according to Claim 1, wherein a surface of the molded article has a Barcol hardness of 30 or more.

21. (New) The molded article according to Claim 20, wherein a surface of the molded article has a Barcol hardness of 40 or more.
